MARCH 9, 2001

GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agriculture Code.

The Final Grape Crush Report includes all grape tonnage crushed during the 2000 season. Changes in tonnage, Brix, and prices from the preliminary report to this final report were due to additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and were priced by February 25, 2001, late reports, and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Details of the crushed tonnage, degrees Brix, and weighted average prices were reported by grape type and variety, as well as by grape pricing districts. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover. Beginning with the 2000 crop year, Valdepenas variety grapes were combined with Tempranillo variety grapes, and Muscadelle variety grapes were combined with Sauvignon Vert variety grapes.

SUMMARY OF GRAPE TONNAGES AND PRICES

The 2000 crush totaled a record 3,951,185 tons, up 24 percent from the 1999 crush of 3,185,463 tons and up 1.5 percent from the 1997 crush of 3,891,403 tons. Red wine varieties accounted for the largest share of all grapes crushed, at 1,815,810 tons, up 28 percent from 1999. The 2000 white wine variety crush totaled 1,502,696 tons, up 26 percent from 1999. Tons crushed of raisin type varieties totaled 512,960, up 22 percent from 1999, while tons crushed of table type varieties totaled 119,719, down 20 percent from 1999. (See chart below.)

Beginning with the 1999 season, the Grape Crush Report includes the total number of tons crushed that will be marketed as grape concentrate. In determining grape tonnage crushed for concentrate production, each processor was required to report the estimated equivalent tons of grapes crushed that are expected to be marketed as grape concentrate. For the 2000 season, this total was 744,828 tons, approximately 19 percent of the 2000 grape crush total. This report provides only the aggregate figure for grapes crushed for concentrate production and does not include information by district, type, or variety.

California grape growers received prices in 2000 that were, on average, slightly below the 1999 prices. The 2000 average price of all varieties was \$504.23, down 4 percent from 1999. Average prices for the 2000 crop by type were as follows: red wine grapes, \$627.97, down 3 percent from 1999; white wine grapes, \$499.99, down 4 percent from 1999; raisin grapes, \$125.09, down 38 percent; and table grapes, \$117.96, down 37 percent. These price levels have not been adjusted for inflation.

LEADING GRAPE VARIETIES AND DISTRICTS

In 2000, Chardonnay accounted for the largest percentage of crush volume, 16 percent. Thompson Seedless, a raisin grape variety, accounted for the second leading percentage of crush with 12 percent of the total crush. The remaining top ten were all wine varieties.

Grapes produced in District 4 (Napa County) received the highest average price of \$2,467.08 per ton, up 15 percent from 1999. District 3 (Sonoma and Marin counties) received the second highest return of \$2,038.71, up 8 percent from 1999. Of the grapes grown Statewide, the top five varieties receiving the highest average price were all wine grape varieties. Scheurebe received the highest average price for the second year in a row at \$4,504.12 ^{1/} per ton. Pinot St. George received the second highest average price of \$3,200.00 ^{1/} per ton followed by Freisa with \$2,554.63 ^{1/} per ton, Petite Verdot at \$2,064.41 per ton, and Vernaccia at \$2,030.90 ^{1/} per ton. The 2000 Chardonnay price of \$895.07 was down 10 percent from 1999, while the 2000 Cabernet Sauvignon price of \$1,047.67 was down 1 percent from 1999. The 2000 average price for Zinfandel grapes decreased to \$464.15, down 6 percent from 1999.

^{1/} These purchases involved less than 50 tons.

EXPLANATION OF TABLES

TABLE 1 is a summary of the 2000 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1999 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 2000 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1999 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 2000 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1999 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 2000 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 1999 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2000 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1999 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2000 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 1999 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 2001 and include any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 2001. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

$$\frac{2,648.6}{131.1} = 20.2$$

Column 16 was obtained by dividing the total Purchased Tons Only (Column 5) into the total dollars paid for these same tons (Column C):

$$\frac{\$50,514.75}{131.1} = \$385.31$$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 2000 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 1999 are given for comparison.

TABLE 8 shows base prices paid to growers by Brix adjustment factors, purchased tonnage, type, variety and reporting district where grown. Weighted average base prices and total purchased tonnage are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 2000 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 1999 are shown. *(Table 9 only appears in the Final Grape Crush Report.)*

TABLE 10 gives the weighted average price per ton, delivered basis, of all tonnage purchased from non-related sources for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2000 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 1999 are shown for comparison. TABLE 10 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Non-Related Purchased Tons: Excludes tonnage of grapes purchased from a grower if:

- (a) The grower or an affiliate of the grower, or both the grower and the affiliate of the grower, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the winery (processor);
- (b) The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the grower;
- (c) The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, provided long-term financing to the grower in exchange for rights or options to purchase a significant portion of the grower's harvest.

TABLE 8 - SUPPLEMENT: BRIX ADJUSTMENT FACTORS

The following Brx adjustment factors are on a per degree Brx basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brx acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brx, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

TABLE 8 - SUPPLEMENT: BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agriculture Code.

The Final Grape Crush Report includes all grape tonnage crushed during the 2001 season. Changes in tonnage, Brix, and prices from the preliminary report to this final report were due to additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and were priced by February 25, 2002, late reports, and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Details of the crushed tonnage, degrees Brix, and weighted average prices were reported by grape type and variety, as well as by grape pricing districts. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover. Beginning with the 2000 crop year, Valdepenas variety grapes were combined with Tempranillo variety grapes, and Muscadelle variety grapes were combined with Sauvignon Vert variety grapes. In 2001, Pinot St. George variety grapes were combined with Negrette, Syrah Noir with Syrah, and Touriga with Touriga Nacional.

SUMMARY OF GRAPE TONNAGES AND PRICES

The 2001 crush totaled 3,369,505.2 tons, down 15 percent from the record 2000 crush of 3,951,185 tons. Red wine varieties accounted for the largest share of all grapes crushed, at 1,708,403 tons, down 6 percent from 2000. The 2001 white wine variety crush totaled 1,299,737 tons, down 14 percent from 2000. Tons crushed of raisin type varieties totaled 261,263, down 49 percent from 2000, while tons crushed of table type varieties totaled 100,103 down 16 percent from 2000. (See chart below.)

Beginning with the 1999 season, the Grape Crush Report includes the total number of tons crushed that will be marketed as grape concentrate. In determining grape tonnage crushed for concentrate production, each processor was required to report the estimated equivalent tons of grapes crushed that are expected to be marketed as grape concentrate. For the 2001 season, this total was 536,614 tons, approximately 16 percent of the 2001 grape crush total. This report provides only the aggregate figure for grapes crushed for concentrate production and does not include information by district, type, or variety.

California grape growers received prices in 2001 for raisin, table, and white wine grapes that were, on average, less than the 2000 prices, while the prices received for red were, on average, above the 2000 prices. The 2001 average price of all varieties was \$553.49, up 10 percent from 2000. Average prices for the 2001 crop by type were as follows: red wine grapes, \$678.50, up 8 percent from 2000; white wine grapes, \$490.88, down 2 percent from 2000; raisin grapes, \$85.65, down 32 percent; and table grapes, \$87.16, down 26 percent. These price levels have not been adjusted for inflation.

LEADING GRAPE VARIETIES AND DISTRICTS

In 2001, Chardonnay accounted for the largest percentage of crush volume with 17 percent. Cabernet Sauvignon accounted for the second leading percentage of crush with 12 percent of the total crush. The next eight highest percentages of grapes crushed, with the exception of Thompson Seedless, were all wine varieties

Grapes produced in District 4 (Napa County) received the highest average price of \$2,827.27 per ton, up 15 percent from 2000. District 3 (Sonoma and Marin counties) received the second highest return of \$2,156.83, up 6 percent from 2000. Of the grapes grown Statewide, Negrette received the highest average price of \$2,142.58 1/ per ton followed by Vernaccia with \$2,033.32 1/ per ton. Marechal Foch, Blaufrankisch, and De Chaunac rounded out the top five highest average prices with \$2,000.00 1/ per ton each. The 2001 Chardonnay price of \$845.60 was down 6 percent from 2000, while the 2001 Cabernet Sauvignon price of \$1,070.97 was up 2 percent from 2000. The 2001 average price for Merlot and Zinfandel grapes increased to \$1,002.40 and \$520.87, up 5 percent and 12 percent from 2000, respectively.

1/ These purchases involved less than 50 tons.

EXPLANATION OF TABLES

TABLE 1 is a summary of the 2001 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 2000 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 2001 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 2000 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 2001 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2000 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 2001 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 2000 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2001 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2000 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2001 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2000 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 2002 and include any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 2002. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

Column 4 was obtained by dividing the total Over the Scale Tons (Column 3) into the Total Brix of these same tons (Column A):

$$\frac{3,841.9}{186.6} = 20.6$$

Column 7 was obtained by dividing the Purchased Tons Only (Column 5) into the Total Brix of these same tons (Column B):

$$\frac{2,648.6}{131.1} = 20.2$$

Column 16 was obtained by dividing the total Purchased Tons Only (Column 5) into the total dollars paid for these same tons (Column C):

$$\frac{\$50,514.75}{131.1} = \$385.31$$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 2001 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 2000 are given for comparison.

TABLE 8 shows base prices paid to growers by Brix adjustment factors, purchased tonnage, type, variety and reporting district where grown. Weighted average base prices and total purchased tonnage are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 2001 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 2000 are shown. *(Table 9 only appears in the Final Grape Crush Report.)*

TABLE 10 gives the weighted average price per ton, delivered basis, of all tonnage purchased from non-related sources for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2001 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2000 are shown for comparison. TABLE 10 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Non-Related Purchased Tons: Excludes tonnage of grapes purchased from a grower if:

- The grower or an affiliate of the grower, or both the grower and the affiliate of the grower, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the winery (processor);
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the grower;
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, provided long-term financing to the grower in exchange for rights or options to purchase a significant portion of the grower's harvest.

TABLE 8 - SUPPLEMENT: BRIX ADJUSTMENT FACTORS

The following Brx adjustment factors are on a per degree Brx basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brx acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brx, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Final Grape Crush Report includes all grape tonnage crushed during the 2002 season. Changes in tonnage, Brix, and prices from the preliminary report to this final report were due to additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and were priced by February 25, 2003, late reports, and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Details of the crushed tonnage, degrees Brix, and weighted average prices were reported by grape type and variety, as well as by grape pricing districts. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

SUMMARY OF GRAPE TONNAGES AND PRICES

The 2002 crush totaled 3,787,139 tons, up 12 percent from the 2001 crush of 3,368,265 tons. Red wine varieties accounted for the largest share of all grapes crushed, at 1,816,716 tons, up 6 percent from 2001. The 2002 white wine variety crush totaled 1,287,865 tons, down 1 percent from 2001. Tons crushed of raisin type varieties totaled 621,928, up 138 percent from 2001, while tons crushed of table type varieties totaled 60,629 down 40 percent from 2001. (See chart below.)

Beginning with the 1999 season, the Grape Crush Report includes the total number of tons crushed that will be marketed as grape concentrate. In determining grape tonnage crushed for concentrate production, each processor was required to report the estimated equivalent tons of grapes crushed that are expected to be marketed as grape concentrate. For the 2002 season, this total was 752,295 tons, approximately 20 percent of the 2002 grape crush total. This report provides only the aggregate figure for grapes crushed for concentrate production and does not include information by district, type, or variety.

California grape growers received prices in 2002 for raisin, table, white and red wine grapes that were, on average, less than the 2001 prices. The 2002 average price of all varieties was \$461.82, down 17 percent from 2001. Average prices for the 2002 crop by type were as follows: red wine grapes, \$613.33, down 10 percent from 2001; white wine grapes, \$431.43, down 12 percent from 2001; raisin grapes, \$75.51, down 12 percent; and table grapes, \$80.49, down 8 percent. These price levels have not been adjusted for inflation.

LEADING GRAPE VARIETIES AND DISTRICTS

In 2002, Thompson Seedless accounted for the largest percentage of crush volume with 16.0 percent. Chardonnay accounted for the second leading percentage of crush with 15.7 percent of the total crush. The next eight highest percentages of grapes crushed were all wine varieties.

Grapes produced in District 4 (Napa County) received the highest average price of \$2,942.39 per ton, up 4 percent from 2001. District 3 (Sonoma and Marin counties) received the second highest return of \$2,055.39, down 5 percent from 2001. Of the grapes grown Statewide, Graciano received the highest average price of \$2,733.33 a/ per ton followed by Aleatico with \$2,646.00 a/ per ton. Vernaccia received the third highest average price of \$2,141.85 a/ per ton followed by Negrette with \$2,118.95 a/ per ton and Melon with \$2,058.93 a/ per ton.

The 2002 Chardonnay price of \$682.64 was down 19 percent from 2001, while the 2002 Cabernet Sauvignon price of \$1,026.48 was down 4 percent from 2001. The 2002 average price for Merlot and Zinfandel grapes decreased to \$859.18 and \$476.05, down 15 percent and 10 percent from 2001, respectively.

a/ These purchases involved less than 50 tons.

EXPLANATION OF TABLES

TABLE 1 is a summary of the 2002 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 2001 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 2002 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 2001 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 2002 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2001 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 2002 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 2001 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2002 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2001 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2002 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2001 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 2003 and include any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 2003. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

Column 4 was obtained by dividing the total Over the Scale Tons (Column 3) into the Total Brix of these same tons (Column A):

$$\frac{3,841.9}{186.6} = 20.6$$

Column 7 was obtained by dividing the Purchased Tons Only (Column 5) into the Total Brix of these same tons (Column B):

$$\frac{2,648.6}{131.1} = 20.2$$

Column 16 was obtained by dividing the total Purchased Tons Only (Column 5) into the total dollars paid for these same tons (Column C):

$$\frac{\$50,514.75}{131.1} = \$385.31$$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 2002 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 2001 are given for comparison.

TABLE 8 shows base prices paid to growers by Brix adjustment factors, purchased tonnage, type, variety and reporting district where grown. Weighted average base prices and total purchased tonnage are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 2002 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 2001 are shown. **(Table 9 only appears in the Final Grape Crush Report.)**

TABLE 10 gives the weighted average price per ton, delivered basis, of all tonnage purchased from non-related sources for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2002 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2001 are shown for comparison. TABLE 10 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Non-Related Purchased Tons: Excludes tonnage of grapes purchased from a grower if:

- (a) The grower or an affiliate of the grower, or both the grower and the affiliate of the grower, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the winery (processor);
- (b) The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the grower;
- (c) The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, provided long-term financing to the grower in exchange for rights or options to purchase a significant portion of the grower's harvest.

TABLE 8 - SUPPLEMENT: BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

TABLE 8 - SUPPLEMENT: BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Final Grape Crush Report includes all grape tonnage crushed during the 2003 season. Changes in tonnage, Brix, and prices from the preliminary report to this final report were due to additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and were priced by February 20, 2004, late reports, and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Details of the crushed tonnage, degrees Brix, and weighted average prices were reported by grape type and variety, as well as by grape pricing districts. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

SUMMARY OF GRAPE TONNAGES AND PRICES

The 2003 crush totaled 3,370,012 tons, down 11 percent from the 2002 crush of 3,786,831 tons. Red wine varieties accounted for the largest share of all grapes crushed, at 1,633,541 tons, down 10 percent from 2002. The 2003 white wine variety crush totaled 1,230,255 tons, down 4 percent from 2002. Tons crushed of raisin type varieties totaled 421,981, down 32 percent from 2002, while tons crushed of table type varieties totaled 84,235, up 39 percent from 2002. (See chart below.)

Beginning with the 1999 season, the Grape Crush Report includes the total number of tons crushed that will be marketed as grape concentrate. In determining grape tonnage crushed for concentrate production, each processor was required to report the estimated equivalent tons of grapes crushed that are expected to be marketed as grape concentrate. For the 2003 season, this total was 506,877 tons, approximately 15 percent of the 2003 grape crush total. This report provides only the aggregate figure for grapes crushed for concentrate production and does not include information by district, type, or variety.

California grape growers received prices in 2003 for raisin and table grapes that were, on average, above the 2002 prices, while the prices received for red and white wine grapes were, on average, below the 2002 prices. The 2003 average price of all varieties was \$471.46, up 2 percent from 2002. Average prices for the 2003 crop by type were as follows: red wine grapes, \$608.60, down 1 percent from 2002; white wine grapes, \$428.88, down 1 percent from 2002; raisin grapes, \$95.12, up 26 percent; and table grapes, \$91.35, up 13 percent. These price levels have not been adjusted for inflation.

LEADING GRAPE VARIETIES AND DISTRICTS

In 2003, Chardonnay accounted for the largest percentage of crush volume with 17 percent. Thompson Seedless accounted for the second leading percentage of crush with 12 percent of the total crush. The next eight highest percentages of grapes crushed were all wine varieties.

Grapes produced in District 4 (Napa County) received the highest average price of \$3,032.51 per ton, up 3 percent from 2002. District 3 (Sonoma and Marin counties) received the second highest return of \$1,947.38, down 5 percent from 2002. The 2003 Chardonnay price of \$665.01 was down 3 percent from 2002, while the 2003 Cabernet Sauvignon price of \$1,013.60 was down 1 percent from 2002. The 2003 average price for Merlot and Zinfandel grapes decreased to \$791.95 and \$427.83, down 8 percent and 10 percent from 2002, respectively.

EXPLANATION OF TABLES

TABLE 1 is a summary of the 2003 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 2002 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 2003 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 2002 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 2003 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2002 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 2003 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 2002 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2003 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2002 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2003 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2002 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 2004 and include any Brix adjustments, bonuses or allowances. Prices from some reference price contracts written prior to January 1, 1977 may be included if settled by January 10, 2004. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

Column 4 was obtained by dividing the total Over the Scale Tons (Column 3) into the Total Brix of these same tons (Column A):

$$\frac{3,841.9}{186.6} = 20.6$$

Column 7 was obtained by dividing the Purchased Tons Only (Column 5) into the Total Brix of these same tons (Column B):

$$\frac{2,648.6}{131.1} = 20.2$$

Column 16 was obtained by dividing the total Purchased Tons Only (Column 5) into the total dollars paid for these same tons (Column C):

$$\frac{\$50,514.75}{131.1} = \$385.31$$

TABLE 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 2003 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 2002 are given for comparison.

TABLE 8 shows base prices paid to growers by Brix adjustment factors, purchased tonnage, type, variety and reporting district where grown. Weighted average base prices and total purchased tonnage are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

TABLE 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 2003 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 2002 are shown. (*Table 9 only appears in the Final Grape Crush Report.*)

TABLE 10 gives the weighted average price per ton, delivered basis, of all tonnage purchased from non-related sources for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2003 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2002 are shown for comparison. TABLE 10 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Non-Related Purchased Tons: Excludes tonnage of grapes purchased from a grower if:

- The grower or an affiliate of the grower, or both the grower and the affiliate of the grower, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the winery (processor);
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the grower;
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, provided long-term financing to the grower in exchange for rights or options to purchase a significant portion of the grower's harvest.

TABLE 8 - SUPPLEMENT: 2003 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.
